EN 12845 Fire Fighting packaged systems  In Europe, there is a unified norm for Permanent Fire suppression systems, design, installation & maintenance, regarding automatic sprinkler systems in buildings. That is the EN 12845. All member countries of the EU have incorporated into their standards the EN 12845. This presentation gives an overview of the available high standard technology offered today, showing in detail the key aspects of the modular construction of these systems, which when connected together, they form a packaged fire suppression system, that can be certified by any certification organisation or insurance company.		
Short CV:		
Product manager for HVAC, Training Manager, Responsible Engineer for products and applications, Business supporter for sales team, Main Speaker / Lecturer for conferences & seminars, Article publisher.
