ENERGY in BUILDINGS 2018

Saturday November 3, 2018
Athens, Hellas

#	Andrés Sepúlveda Madrid Politechnic University Chemical Engineer IFL MBA	
Title:	Commtech Commissioning Services CEO, Madrid, Spain	
email:	andres.sepulveda@commtech.es	•
Presentation title:	Commissioning Management for High-Performance Buildings	
<p>Occupants, building owners and managers benefit from having a comfortable, efficient, reliable, safe, secure, sustainable and well-maintained building. However, many new constructed and existing buildings even those well-designed and built do not fulfill the Owner Project/Current Facility Requirements, sometimes because they were not clearly stated at the predesign or occupation phase, sometimes because their compliance throughout the various project phases or building life cycle was/is not verified and documented. The Commissioning Process is a quality-focused process focuses on verifying and documenting that a building and all of its systems, assemblies and equipment are planned, designed, installed, tested and operated to meet the Owner's Project Requirements and managed by a well-trained O&M Staff.</p>		
CV:	<p>Andrés Sepúlveda is a Chemical Engineer by the Madrid Politechnic University, a IFL University MBA, Commtech and Fagerhult Spain CEO, ASHRAE Spain Chapter Vice President (CTTC-Chair), ASHRAE Commissioning Building Technical Committee Member and Region XIV Nominating Committee Reserve Alternate.</p> <p>Previously holding the following positions:</p> <ul style="list-style-type: none">ASHRAE Spain PresidentIMI Hydronic Engineering Vice PresidentTour&Andersson Spain and South America Managing DirectorATECYR SecretaryWestinghouse Spain Decontamination and Radwaste Treatment Department Head <p>Author of many articles and articles on Hydronic Balancing and Building Commissioning.
