#	Thanos Daskalopoulos BS Survey Engineer, Self-Taught Software Engineer	
Title:	Chief Innovation Officer at Delphis SA, Athens, Greece	
email:	thdaskalopoulos@delphisgroup.gr	•
Presentation title:	Data Services for the Modern Built Environment	
<p>Today the technologies of Internet of Things and AI are radically changing the amount, quality and cost of information that can be extracted from the built environment. In this fast changing landscape, new sets of applications and services can already be deployed today, with the goal to optimize building performance, improve technical services and create brand new user experiences for tenants in buildings. This presentation will show a comprehensive and affordable approach on data collection, the analytics strategies & technologies that solve real-world problems and several use cases on the new property technology applications like: proactive service, space management, systems evaluation, remote commissioning and more.</p>		
CV:		
<p>Thanos Daskalopoulos began his career as a member of the service management team at Delphis. As a Business Development Director, he helped growing the service department's revenue by 70% in 3 years and introduced a digital culture across all operations. Today he is leading innovation aiming to improve processes, offerings and experiences of Delphis.</p>
