## INTERNATIONAL CONFERENCE “ENERGY IN BUILDINGS ATHENS 2025”

The International Conference “ENERGY in BUILDINGS Athens 2025” is proudly organized by ASHRAE Hellenic Chapter for the 14<sup>th</sup> consecutive year and will be held on Saturday, November 15<sup>th</sup> 2025 at Divani Caravel Athens Hotel starting.

The conference which is organized in collaboration with the Technical Chamber of Greece (TEE) and will host Distinguished Lecturers from USA, EU countries and Greece aspire once again to approach the most important trends in Decarbonization, Sustainability and Energy Saving and attract high quality audience of the built environment such as designers, contractors, developers, investors, facility managers and owners.

The main sessions of this year’s conference are the following :

- Decarbonization & Energy Security
- Sustainability and Green Transition
- Artificial & Building Intelligence
- Energy Saving in Commercial & Industrial Applications

Also, an expertised **Engineering Career Day** will be organized in parallel to the conference, connecting the top HVAC and Energy Saving sponsor companies of the Hellenic Chapter with several Junior and Senior professionals, aiming to bridge market needs with career development.

# PSYCHROMETRICS WORKSHOP

The banner is split into two parts. The left part has a green background with a technical drawing of HVAC ducts. The right part shows a psychrometric chart on a tablet screen. The chart plots Dry-Bulb Temperature (F) on the x-axis (ranging from 10.0 to 130.0) and Humidity Ratio (grains/lb) on the y-axis (ranging from 30.0 to 220.0). Key points are marked: 'Outdoor Air' at approximately (75, 110), 'Mixed Air' at approximately (65, 80), and 'Indoor Air' at approximately (55, 60). A blue line connects these points, and a red line represents the saturation curve. The chart also includes lines for constant wet-bulb temperature and constant enthalpy.

An extra event during the conference will be the high-quality Psychrometric Workshop where an expertised training will be held both for theoretical study and practical application examples on Psychrometry of HVAC systems from top experts of the industry.

## 2025-2026 EVENTS SCHEDULE

### ASHRAE

ASHRAE was founded in 1894 and since then has become a truly International Scientific Society with over 57.000 members worldwide, of which about 3.000 in Europe. ASHRAE has over 200 chapters in more than 130 countries around the world. ASHRAE is a main provider in the creation of standards and certification methodologies in the harmonization of generally accepted practices for the air conditioning industry around the world, such as the design of energy efficient buildings. More information on ASHRAE can be found on the website [www.ashrae.org](http://www.ashrae.org)

### ASHRAE HELLENIC CHAPTER

The Hellenic Chapter's charter was approved in 1999 by the Board of Directors of ASHRAE during the Annual Conference in Seattle, U.S.A. On April 16, 2000 the inaugural event of The Hellenic Chapter was held in a main hotel in Athens. In March 2003 the Hellenic Chapter was founded as a non-profit organization, based in Athens. Ever since, ASHRAE Hellenic Chapter has as its main goal the transportation of knowledge and technology among the entire Greek Technical Community including Educational and Research Institutions, Engineering Companies, Technical Companies, Contractors, Manufacturers and any professional that is interested in HVAC, Renewable Energies and the Building Sector.
